## Parcel Confidentiality

Parcel confidentialities indicate the confidentiality levels that a parcel is marked as. The higher the level, the more trusted driver is needed. To add or delete a parcel confidentiality, the following must be completed:

Number	Name	Description
1	Configure Parcel Confidentiality	To add or delete a parcel confidentiality, the admin must select the "Configure Parcel Confidentiality" from the list of options.

To add a new parcel confidentiality, the admin is required to do the following:

Number	Name	Description
1	Confidentiality Level	To add a new parcel confidentiality, the admin must insert the name of the parcel confidentiality in the input.

|		If the confidentiality level is not provided, an error message is displayed to prompt the user to provide a confidentiality level as shown below: Confidentiality Level: _____ Confidentiality Level required
2	ADD button	To successfully add the new parcel confidentiality to the system, the admin is required to click on this button. Following the successful addition of the parcel confidentiality, the following alert is displayed: Parcel Confidentiality Successfully Added

To delete a parcel confidentiality level, complete the following:

Configure Parcel Confidentiality

Confidentiality Level:

ADD   CANCEL

Existing Parcel Confidentialities	
Confidentiality Level	Configure Confidentiality
High	1 DELETE
Meduim	DELETE
Low	DELETE

Number	Name	Description
1	Delete button	Click this button next to the priority level instance that you wish to delete. A success notification will appear following the deletion of the parcel priority instance: The selected Parcel Confidentiality has been successfully removed from the system

Conclusion

An admin can add and delete parcel deliveries on the system. To create a parcel, the parcel type, priority and confidentiality must be selected. These can be added and deleted by the admin.
